FOREWORD

THIS CATALOGUE is the final portion (Part IV) of the Greek section of the R. Cyril Lockett Collection and includes the coins in gold and silver of Asia Minor, Asia and Africa. The corresponding numbers in the S.N.G. Volume III are from 2639 to the end.

Then follows a remarkable series of the related coppers, both Autonomous and Imperial, quite the most comprehensive that has been offered for many years. The third day of the sale is devoted to this part of the collection.

Mr. Lockett's unique series of Greek Imperial coppers with portraits of Royal Ladies will be found catalogued as lots 3030-3104 inclusive.

All single lots, and a few other pieces as indicated, have been illustrated in the 35 collotype plates.

Weights in grammes, as given in S.N.G., are noted under the S.N.G. numbers, except in the multiple lots, where they are given after the denomination.

In the main, references are to the appropriate British Museum Catalogue, except as otherwise indicated.

In the early section coins are in silver except when stated to be gold or electrum, while in the copper section coins are copper or bronze except when stated to be silver or billon.

PRICED CATALOGUES

Coins

*A*FTER each sale these catalogues are issued with the prices realised printed in the margin opposite each lot, thus giving at a glance a reliable guide to values.

The final test of value must always be auction prices rather than the figures given in books of reference for changing times and fashions soon render the latter obsolete and misleading.

On the average we issue twelve Coin and Medal catalogues a year, some of which are usually of sales of important collections. The **priced catalogues** are posted to subscribers as soon as ready, usually about a week after the date of sale and the subscription is

THIRTY SHILLINGS per annum
